About Apexoria Learning

Your Partner in [Salesforce Excellence](#)

Who We Are

Apexoria Learning is a trusted training institute focused on delivering high-quality Salesforce education designed to make students industry-ready. We specialize in providing career-oriented training programs that combine practical knowledge, real-time scenarios, and expert guidance — helping learners confidently step into the Salesforce ecosystem.

Expert Trainers

- 6-10 years real industry experience
- Real-world use cases & best practices
- Interview-focused curriculum
- Live interactive sessions
- Continuous mentorship & support

Additional Services

- Interview Support & Coaching
- Job Assistance & Referrals
- Resume Building
- Mock Interviews (Weekend)
- Certification Guidance
- Career Mentorship

Who Should Attend?

FRESHERS

Looking to start a career in IT

CAREER SWITCHERS

Professionals planning to move to Salesforce

SALESFORCE ADMINS

Looking to move into Development roles

DEVELOPERS & TESTERS

Upgrading their existing technical skills

ANYONE

Aiming for a high-growth Salesforce career

Salesforce Complete Program

The only course you need to go from beginner to **job-ready**

Rs. 21,999 | 70 Hours | 3 Months | 16 Modules | Real-Time Projects | AI Tools

MODULE 1

CRM & Salesforce Foundation

- What is CRM? Types (Operational, Analytical, Collaborative)
- Cloud Computing (SaaS, PaaS, IaaS)
- Salesforce Architecture (Multi-tenant)
- Salesforce Products Overview (Sales, Service, Marketing)
- Editions & Licensing
- Environments: Production vs Sandbox

Hands-on:

- Create Developer Org
- Navigate Lightning UI
- Customize App Launcher

MODULE 2

Data Modeling (Deep Dive)

- Standard vs Custom Objects (Use Cases)
- Field Types
- Relationship Scenarios
- Roll-Up Summary (COUNT, SUM, MIN, MAX)
- Schema Builder Usage

Hands-on:

- Create Banking Data Model
- Account → Loan → Payment relationship
- Create junction object for co-applicants

MODULE 3

Security Model (Critical for Interviews)

- OWD (Private/Public Read Only/Public Read Write)
- Role Hierarchy (Data Visibility)
- Profiles vs Permission Sets
- Sharing Rules
- Field-Level Security
- Record-Level vs Object-Level Security

Hands-on:

- Restrict Loan data visibility
- Create role-based access (Manager vs Agent)

MODULE 4

Automation (Flow Mastery)

- Workflow Rules (Legacy understanding)
- Process Builder (Why replaced)
- Flow Builder (CORE FOCUS)
- Flow Elements
- Approval Process

Hands-on:

- Auto-create Loan record when Account created
- Approval flow for Loan > ₹5 Lakhs
- Screen Flow for Loan Application UI

MODULE 5

Data Management

- Data Import Wizard vs Data Loader
- Insert, Update, Upsert, Delete
- Data Export Service
- Duplicate Rules & Matching Rules

Hands-on:

- Bulk upload 100+ Account records
- Perform Upsert using External ID

MODULE 6

Reports & Dashboards

- Report Types
- Custom Report Types
- Filters, Bucketing, Grouping
- Dashboard Components:

Hands-on:

- Create Loan Status Dashboard
- Monthly Performance Report

MODULE 7

APEX + LWC (CORE DEVELOPMENT)

Apex Programming (Strong Foundation)

- Apex Syntax & Structure
- OOP Concepts
- Data Types
- Collections
- SOQL
- DML Operations
- Exception Handling

Hands-on:

- Write class to manage Loan records
- Query related Account data

MODULE 8

Apex Triggers (Real-Time Scenarios)

- Trigger Events (Before/After Insert/Update/Delete)
- Context Variables
- Bulkification (Governor Limits)
- Trigger Framework (Best Practice)

Hands-on:

- Prevent duplicate Loan creation
- Update Account credit score on Loan approval
- Validation using trigger logic

MODULE 9

Asynchronous Apex

- Future Methods (Callouts)
- Batch Apex (Large Data Processing)
- Queueable Apex
- Scheduled Apex

Hands-on:

- Batch job to update Loan status
- Scheduled job for EMI reminders

MODULE 10

Test Classes

- Test Class Structure
- @isTest annotation
- Test.startTest() / stopTest()
- Mock Callouts
- Code Coverage

Hands-on:

- Write test class for Trigger & Apex class
- Achieve 75%+ coverage

MODULE 11

LWC (Full Deep Dive)

Basics:

- LWC vs Aura
- Component Structure (HTML, JS, XML)

Core Concepts

- Data Binding (One-way, Two-way)
- Decorators

Events & Communication

- Child → Parent (Custom Events)
- Parent → Child (@api methods)
- Pub-Sub Model

UI Development

- lightning-card
- lightning-input
- lightning-button
- lightning-datatable

Apex Integration

- Imperative Calls
- @wire Methods
- Error Handling

Lifecycle Hooks

- constructor()
- connectedCallback()
- renderedCallback()
- disconnectedCallback()

Hands-on Project:

Build Loan Application LWC

- Form submission
- Data table display
- API integration

MODULE 12

INTEGRATION + ADVANCED + AI

Integration (Real-Time)

- REST API Basics
- HTTP Methods
- Callouts using Apex
- Named Credentials
- JSON Parsing

Hands-on:

- Integrate external API for PAN / Credit Score verification

MODULE 13

Omni-Channel

- Service Channels
- Routing Configurations
- Queues
- Presence Status
- Agent Setup

Hands-on:

- Auto-assign Cases to agents
- Configure agent availability

MODULE 14

Agentforce

- AI Agents in Salesforce
- Automation using AI
- Use Cases (Support, Sales)

Hands-on:

- Configure basic AI agent scenario

MODULE 15

Salesforce Copilot

- Copilot Overview
- Prompt-based Actions
- AI Suggestions in CRM

Hands-on:

- Use Copilot for case summarization
- Generate responses using AI

MODULE 15

Deployment & DevOps

- Change Sets
- Sandbox Strategy
- Git Basics
- Debug Logs
- Deployment Best Practices

By the end of this course, you will be able to:

- ✓ Build complete Salesforce applications
- ✓ Develop LWC components & Apex logic
- ✓ Integrate Salesforce with external systems
- ✓ Crack Salesforce Developer Interviews

Salesforce Crash Course

From Basic to Interview-Ready in **Just 30 Days**

Rs. 9,999 | 22 hrs per month | 1 Month Intensive | Interview-Focused | 2 Live Projects

Already have basic Salesforce knowledge? This intensive 1-month program fast-tracks you to interview-readiness with deep focus on Apex, LWC, Integration and real development scenarios. Ideal for those who want results fast without starting from scratch

What You Will Learn?

- Quick Admin Revision (Objects, Security, Flows)
- Apex Development & OOP Concepts Apex Triggers (Scenario-Based) Async
- Apex (Future & Batch Basics)
- Test Classes & Best Practices
- LWC Component Creation
- Data Binding & Events in LWC
- REST API Callouts & Integration
- Real-Time Development Scenarios
- Mini Project: Loan / Case Management

Why Crash Course?

- SF Admins moving into Development
- Developers / Testers switching to Salesforce
- Anyone prepping for SF Developer interviews
- Professionals with basic Salesforce knowledge
- Those who want quick upskilling
- Career changers targeting IT roles

Mini Project (Hands-On):

Loan / Case Management System — Apex + LWC + Integration

Build a complete deployable mini-app covering the full development lifecycle with real-world complexity.

By the end of this course, you will be able to:

- ✓ Write Apex Triggers & Classes confidently
- ✓ Build LWC components with real scenarios
- ✓ Perform basic integrations using REST APIs
- ✓ Crack Salesforce Developer Interviews faster

Salesforce QA Testing Course

No Coding. No Experience. Just the Right Training.

3 Months | Weekday Batches | No Tech Background Required

Step into the world of **Salesforce Quality Assurance**. This course equips you with Manual Testing, API Testing using Postman, and Salesforce Admin knowledge — making you job-ready for QA roles in CRM and Salesforce projects, even without any technical background.

MANUAL TESTING

- Software Testing Life Cycle (STLC)
- Software Development Life Cycle (SDLC)
- Test Case Writing & Execution
- Test Scenarios & Bug Reporting
- Severity vs Priority
- Regression Testing, Smoke Testing
- Agile Testing & Sprint Process
- Tools: JIRA (Bug Tracking & Reporting)

API TESTING

- Introduction to APIs & REST Services
- HTTP Methods (GET, POST, PUT, DELETE)
- Status Codes & Response Validation
- JSON Basics & Data Handling
- API Testing using tools (Postman)
- Writing Test Scenarios for APIs
- Authentication & Real-Time Use Cases

SALESFORCE ADMIN

- Salesforce Basics & Navigation
- Standard & Custom Objects
- Fields & Relationships
- Validation Rules
- Page Layouts
- Flows (Understanding Automation)
- Reports & Dashboards
- Security Basics (Profiles, Roles)

SALESFORCE TESTING

- Testing Salesforce Applications
- Testing Apex & LWC (Basic Understanding)
- Data Validation in Salesforce
- UI Testing (Lightning Experience)
- Integration Testing (API + Salesforce)
- Real-Time Testing Scenarios in CRM

SPECIAL FOCUS

Mini Project (Hands-On):

Loan / Case Management System — Apex + LWC + Integration

Build a complete deployable mini-app covering the full development lifecycle with real-world complexity.

By the end of this course, you will be able to:

- ✓ Write and execute test cases confidently
- ✓ Perform API testing using real tools
- ✓ Work in Agile teams
- ✓ Crack QA & Salesforce Testing Interviews

Guaranteed placement opportunities and job support
